Subject: "Practice of evaluating human health risks of chemicals" Course at Texas A&M
VIBS 689 RA practice 2017 syllabus final.doc

Dear colleagues,

I would like to thank you again for agreeing to visit or call in to teach in our course in the Spring. I attach here the finalized syllabus and guest lineup. We will be sending out call-in instructions to those of you who will be dialing in a few days before the date of your presentation. Do please block the time between 8 am and 10 am Central US time on your calendars, or let me know if you wish me to send a calendar invite.

I would like to thank you again on behalf of the trainees who will be the beneficiaries of the interactions with each and every one of you. I am very grateful for your time and support!

Ivan
